

Re S.p.A. at K show with a wide array of technologies for the plastic industry (Hall 4, stand D35)

After long time, K show will be the right opportunity for Re S.p.A. to show all the best technological solutions for the plastic industry. For this occasion, we want to strengthen our position on the market as provider of technological solution for plastic process. We have the widest array of solution on the market for the web tension control, web alignment, web viewing and web handling that we have developed during more than 45 years of history.

At K, Re S.p.A. will exhibit the complete basket of web guiding systems. Re's web guide are available with different sizes and, accordingly to the application and the customers' requests, they can be equipped with ultrasonic, infrared or line sensors, with cutting table, with the remote keypad or integrated in the frame and with many other options. The key point for all Re's system is the ease of calibration and installation and the intuitive interface to set easily and quickly the whole system.

Moreover, in the plastic production process it is required to align and read the width of the plastic film. Thanks to the motorized sensor holders with encoder and driver integrated on the stepping motors, we ensure precision and quickness for the positioning of the sensors. It can be used both for edge control, center control or web width reading using infrared, ultrasonic or optical sensors.

At Re S.p.A. booth, a demo machine will display the complete array of Re products for the plastic and converting industry.

Visitors will discover the wide range of Combiflex and Extreme pneumatic brakes and Eleflex electromagnetic brakes that, together with load cells and tension controllers, guarantee a precise and reliable control of the web tension during the whole process of the material.

To complete the portfolio of products for the industry, a wide range of expanding shafts, friction shafts and safety chucks needed for a perfect unwinding and rewinding of paper rolls.

Re S.p.A., since 1974, has been recognized all over the world as a leader for the automation process of laminates; reliability, innovation and customer care have always allowed Re S.p.A. to excel. During K show, Re S.p.A. staff will be happy to meet customers, partners, media and all stakeholder of plastic industry and give them all information they need about the company and its technologies.

ONE COMPANY...1000 SOLUTIONS
