On occasion of the K event in Duesseldorf, Bieffebi Leading Company specialized in the manufacturing of mounters for flexible packaging and corrugated on the market since 1955, will present the latest technological developments in **HALL 4 BOOTH 4A22**.

Three machines in the spotlight: one Automatic and one Semiautomatic mounters, one Demounter will be live demo exhibited at the K to show their accuracy, reliability and repetition.

The absolute precise Bieffebi Automatic plate mouter model **AUTOMA 374** is totally made in Italy.

Thanks to its newest and highest technology both in mechanics and in software, the AUTOMA 374 is proved to be the most accurate, fast and reliable mouter in the market.

The Bieffebi worldwide patented VDP (Virtual Data Processing) system using the plate file, which enables the mounting of small pieces and guarantee the control of the register not only on the cross marks in the plates but on the graphics too (Patents EP1666251(B1), US8037819(B2) makes AUTOMA the most versatile mouter.

Bieffebi plate mouter model **UNICA 343VM** is totally made in Italy.

This motorized plate mouter mounts traditionally with cross marks and also by means of the worldwide patented VDP (Virtual Data Processing) system using the plate file, which enables the mounting of small pieces and guarantees the control of the register not only on the cross marks in the plates but on the graphics too (Patents EP1666251(B1), US8037819(B2)).

Very fast and accurate it gives the certitude that the plates are mounted correctly before they are sent to the press avoiding so unnecessary down times.
