## NEW SPRAY MACHINES FOR POLYURETHANE FOAM, POLYUREA AND OTHER RESINS

Magma Machine, Italian manufacturer of machines and plants for polyurethanes and bi-component resins, present on the Italian and foreign markets for more than twenty years, will present the new series of machines for "hot spray" application of polyurethanes, polyurea, and other resins, the **new MC e+ series** :

7" color touch screen

Electronic pressure gauge

MS LC e+

Electronic gear flow meters

Hydraulic unit

The new machines of the **MC e+ series**, with color touch screen control panel, equipped with software specially designed to facilitate remote control of the machine from a telephone, tablet and pc with the ability to modify all parameters, complete with all safety protections a dispensing gun with automatic air

purge , heated hoses, are designed to ensure maximum interactivity between operator and machine with constantly updated reports, high quality of application and reduction of downtime, thanks to predictive maintenance. Lower total use of energy required, hydraulic system, fixed or variable ratio model, small sizes, reduced dimensions complete the features of the MS e+ series, with output from 4 to 20 Kg/min. Magma staff will welcome visitors at stand **13A88** to show in detail the new features of **spray machines series MS e+**
