AUTOMATIC DOSING SYSTEM FOR THE PLASTIC INDUSTRY

Color Service has the pleasure to introduce a
New Dosing Technology completely dedicated to the
Plastic Industry for the weighing of powder ingredients.

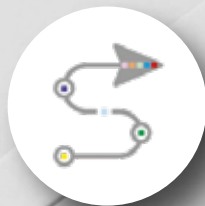

NEW CUTTING-EDGE TECHNOLOGIES

DESIGNED AND MANUFACTURED IN ITALY

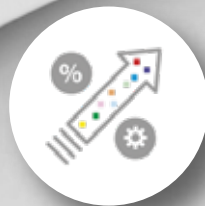

ACCURACY

Our systems guarantee high accuracy, precision through several devices according to the shape of the material you have to dose.

TRACEABILITY

Color Service can provide complete tracking and traceability of the dosing. All the processes are automatically monitored and data are recorded in our software system.

RELIABILITY

Color Service guarantees reliable, long-lasting technical results with high standard machinery while providing sustainable profitability and high-quality production.

ECO SUSTAINABILITY

Our systems are all eco-friendly enabling to reduce energy consumption environment pollution and material wasting.

USER FRIENDLY

Our system's software and diagnostic are user-friendly and intuitive. This enables the operator to easily manage our system without complications.
